## **IbSB 2022**

### **6th International Symposium on Image-based Systems Biology**

Participate in the *6th International Symposium on Image-based Systems Biology*, which will be held from **September 8-9, 2022** at the HKI in Jena.

Researchers from all fields are invited to communicate their results centered on Image-based Systems Biology in order to exchange novel scientific methods and to share recent achievements from image-driven research in biology. Joint studies of experiment and theory will be highly welcomed. Furthermore, demonstrations of methods for accurate segmentation and classification of regions of interest or object-tracking that can be applied for high-content and high-throughput screening are of interest, as well as computational methods for translating images into mathematical models ranging from differential equations to agent-based methods.

Further information can be found on the [IbSB website](#).

We are looking forward to welcoming you in person again this year!
